Mayor and Council,

It became apparent last evening talking with Henry after the council meeting that correspondence from Skykomish Hotel is not being disseminated to council members. Therefore, we are also sending Town correspondence to your personal emails. Please advise if you do not care what is going in Town and wish to unsubscribe from this list.

This email is to notify you that two issues need to be resolved regarding actions which have negatively impacted the Skykomish Hotel:

1. Two street light poles need to be moved. One is blocking the Hotel's parking access on 5<sup>th</sup> street and the second one at the corner of 5<sup>th</sup> and Railroad shines light directly in the sleeping area of Mr. Benz' apartment on the third floor.
2. We have yet to be notified when the septic line for the Hotel, incorrectly installed at the time of the installation of the wastewater treatment system, will be moved to the correct legal location on the property. Keep in mind this will require an access agreement between the Town and Hotel owners in order for the Town to legally gain access to that area where the line is presently located.

Please advise when these issues will be resolved.
